

## CareWorks Makes the Case for Using PivotViews with Microsoft Dynamics GP

*“As a finance and accounting professional, I’ve enjoyed working with Microsoft Dynamics GP for more than 25 years. However, generating the reports I need in the format I need has always been a time-consuming challenge. Not only is the PivotViews team a pleasure to work with, but their reporting tools simplify the process of creating reports for a professional presentation.”*

Lorry Charbonnet, Client Finance Manager

### The Challenges

- Dynamics GP SmartLists were not user friendly or flexible; very time-consuming
- Required a lot of manipulation and extra steps to create a professional presentation
- Often had to create multiple reports and combine them to get the one report needed

### The Solution

- Pivot Views to extract and deliver data for a professional presentation
- Modern, advanced grids with customizable features for data analysis and reporting
- Parameterized reports provide just the data you want – as many parameters as you want

### The Benefits

- Simplicity! User friendly, easy to learn, easy to set up, easy to manipulate
- Beautiful layouts with consistent, professional look for custom or recurring reports
- Saves as much as 90 minutes when running reports in exactly the format needed

### About CareWorks
